

Your access to premier, fully integrated infrastructure services.

AECOM project teams fuse top technical expertise around the world with deep local experience, to design and deliver infrastructure, utilities and facilities that meet the needs of our clients and the communities.

Across all components of the in-project cycle — design, build, finance and operate — AECOM is uniquely positioned to deliver a differentiated service, working globally and delivering locally. Our engineers, planners, architects, landscape architects, environmental specialists, economists, scientists, consultants and construction specialists as well as cost, construction, project and program managers are all dedicated to finding the most innovative and appropriate solutions, and to achieve the most successful outcome for our clients.

About AECOM

AECOM is built to deliver a better world. We design, build, finance and operate critical infrastructure assets for governments, businesses and organizations. As a fully integrated firm, we connect knowledge and experience across our global network of experts to help clients solve their most complex challenges. From high-performance buildings and infrastructure, to resilient communities and environments, to stable and secure nations, our work is transformative, differentiated and vital. A *Fortune 500* firm, AECOM had revenue of approximately \$20.2 billion during fiscal year 2018. See how we deliver what others can only imagine at aecom.com and [@AECOM](https://www.instagram.com/aecom).

AECOM in Singapore

We are helping build a smart Singapore by anticipating and solving the complex challenges of designing and delivering a high-performance, liveable built environment for its future.

From Singapore's longest bridge to its first world-class resort, we are proud to have played a significant part in many of the nation's iconic facilities and landmarks by providing services that range from macro level envisioning such as masterplanning for smart new towns, to critical civil infrastructure such as integrated transport corridors and innovative underground utility structures, to ensuring resiliency such as sustainable used water systems and converting traditional waterways into a vibrant green ecosystem.

Our services span the entire asset lifecycle from early feasibility studies, briefing, design, project management and construction, maintenance and operations and where economically justifiable, financing. Some clients choose to appoint us for a specialist single service expertise; others recognise the value we bring to their projects through our full service offering that we provide through a single business approach. What is important is that you have options with AECOM. You can be assured that at all times our work is characterised by a focus on reducing risk, improving value and assuring outcomes.

A selection of our projects

Jurong Innovation District Master Plan

Client: JTC Corporation
Services: Master planning, landscape architecture and wayfinding & signage

Sustainable Development Framework, Planning & Design for Marina Bay and Greater Southern Waterfront

Client: Urban Redevelopment Authority
Services: Landscape architecture, master planning and environmental + ecological planning

Changi Airport Terminal 5 Development

Client: Changi Airport Group
Services: Scheduling and cost estimating consultancy

Deep Tunnel Sewerage System Phase 2

Client: PUB
Services: Feasibility study, preliminary design and programme management

Sengkang General and Community Hospitals

Client: Ministry of Health
Services: Hospital planning, logistics planning, medical equipment planning, interior design (clinical areas), quantity surveying, and fire engineering

Changi Airport Terminal 4 Development

Client: Changi Airport Group
Services: Civil, structural and geotechnical consultancy

Singapore Sports Hub

Client: Dragages Singapore Pte Ltd
Services: Landscape architecture, urban design, master planning and environmental + ecological planning

Syngenta Manufacturing Facility

Client: Syngenta Asia Pacific Pte Ltd
Services: Engineering, procurement and construction management

Integrated Waste Management Facility

Client: National Environment Agency
Services: Detailed engineering plans and design specifications as well as supervision of construction and commissioning and construction supervision

Industry recognition

Our work is widely recognised by the industry and brings transformational outcomes to the communities.
