

About AECOM

AECOM is the world's premier infrastructure firm, delivering professional services throughout the project lifecycle – from planning, design and engineering to consulting and construction management. We partner with our clients in the public and private sectors to solve their most complex challenges and build legacies for generations to come. On projects spanning transportation, buildings, water, governments, energy and the environment, our teams are driven by a common purpose to deliver a better world. AECOM is a Fortune 500 firm with revenue of approximately \$20.2 billion during fiscal year 2019. See how we deliver what others can only imagine at aecom.com and [@AECOM](https://twitter.com/AECOM).

**Supporting the
US Air Force's
global missions**

60+

years of support to the Air Force mission at locations worldwide

30+

current contracts serving Air Force bases worldwide

\$2B

project value completed for the Air Force in the last 10 years

2,000+

task orders executed for the Air Force in the last 10 years

750+

offices worldwide

#2

AECOM's 2020 ENR ranking among the Top 500 Design Firms

“Among the ten firms that are capable of providing these services to the DOD, AECOM has always been at the top of our ‘go to when we need the job done perfectly’ list.”

— Bil Hawkins, USAF SIA Program Manager

AECOM brings 100 years of experience providing support to our military, including 60 years to the US Air Force. With more than 30 contracts in place today, AECOM's strengths lie within our global and enterprise-wide capabilities, rapid response, and diversity of services.

Global and enterprise-wide capabilities. AECOM has provided engineering services for the USAF across the globe, including A/E design and construction oversight in Afghanistan, Installation Development Plans in Europe, A/E design in Japan and Korea and airfield reconstruction on a remote island in Alaska. We've successfully delivered enterprise projects, including a hangar fire suppression system analysis at 71 installations, Sustainable Infrastructure Assessments (SIAs) for 20 bases, environmental conceptual site models for 28 bases and air quality services at more than 50 bases. We understand USAF requirements and our global team is ready to support you.

Diversity of services. AECOM understands the complex challenges the USAF is faced with, and develops innovative solutions to help solve them. We do this by bringing together our unmatched expertise in BUILDER facility condition analysis, energy conservation, real property inventories, space optimization and PACES cost modeling. From planning and design to commissioning, our integrated approach transforms project outcomes with fast-tracked services that means our projects are completed on time, within budget and to the highest standards of safety and quality.

Key capabilities

- A/E services, Title I and Title II
- Asset management
- Construction management
- Contingency/emergency services
- Cultural resources management
- Design-build
- Energy
- Environmental planning/NEPA
- Environmental remediation/HTRW
- Fuel system design
- Master planning
- MILCON and MFH design
- Military munitions response program
- Water resources

Select projects

After Hurricane Michael devastated Tyndall AFB in Florida, AECOM led development of a fast-tracked recovery plan that not only repairs and rebuilds the base, but reshapes it into an "installation of the future."

AECOM is upgrading infrastructure and reducing energy at Buckley AFB in Colorado through an Energy Savings Performance Contract.

AECOM completed an interim removal action for safe elimination of buried chemical warfare materiel at Edwards AFB in California.

AECOM's design and construction services on a design-build 60,000-sf C-17 corrosion control hangar facility and a 20,000-sf maintenance facility at Hickam AFB in Hawaii earned a PACAF Design Award.

AECOM designed the 43,000-sf U.S. Air Force Academy Cyberworx facility, a unique and reconfigurable space for innovative collaboration among the U.S. Air Force, academia, and industry.

AECOM and our collaborative partners are performing restoration and repairs to the building envelope of the iconic U.S. Air Force Academy Chapel in Colorado Springs. Using theoretical models that simulate Colorado's topography and wind conditions, the design will seal out weather elements.
