

Net Zero Carbon Tactics

GREENHOUSE GAS REDUCTION STRATEGIES

Identification and support with implementation of policy and operational measures to reduce greenhouse gas emissions

PLANNING AND TECHNICAL DESIGN

Design, specification and implementation of NBS and broader sustainable land management initiatives for both adaptation and mitigation at a variety of scales

FOREST INVENTORY AND MAPPING

Forest monitoring, land-use planning, landscape-level and watershed development services using the latest technological developments in imaging, including drones and LiDAR data

CARBON MARKETS AND PAYMENTS FOR ECOSYSTEM SERVICES

Design of sustainable funding models such as payments for ecosystem services that support uptake and implementation of NBS

STAKEHOLDER ENGAGEMENT

To foster collaboration across the full spectrum of stakeholders and promote cross-sectoral buy-in and commitment for NBS policies, planning guidelines and projects

NATURAL CAPITAL ACCOUNTING AND ECOSYSTEM SERVICES ASSESSMENTS

To establish the evidence base, identify opportunities for NBS, and evaluate the impacts and effectiveness of interventions
