

# Imagine the federal campus of the future

AECOM has designed and constructed innovative facilities and infrastructure for government clients all over the world. From state-of-the-art headquarters and military installations to complex, resilient infrastructure, AECOM creates spaces that support our clients' most critical missions. We deploy industry-leading innovations and best practices to successfully deliver a wide range of project types, including planning, design, buildings, energy, environmental, civil works, transportation, and water.

AECOM planners provide the full spectrum of services for our government clients, from policy and strategy through site analysis and project execution.

- Asset management
- Economics/Business case analysis
- Climate change/climate resilience studies
- Digital twin development
- Environmental planning
- Intelligent transportation
- Facility requirements analysis and utilization studies
- Master planning and installation/site planning
- PCR/DD Form 1391 development
- Planning program support (policy, tools, and training)
- Programming and charrettes
- Public and stakeholder involvement
- Real property management systems
- Spatial data solutions/Geographic Information Systems (GIS)
- Sustainability and energy studies
- Utility infrastructure studies and capacity analysis
- Workplace evolution strategy

The future is resilient. See it for yourself.
