

# Innovative Environmental Solutions in Our New World

AN AECOM ENVIRONMENTAL WEBINAR SERIES  
**APRIL WEBINARS**

## Tuesday, April 11, 2023 • 11:00 a.m.\* EDT

### Building a Cohesive Digital EHS/ESG Strategy

There is rapidly growing demand for data to support EHS compliance, auditing, internal reporting, sustainability, and now ESG. Larger, multi-national companies must also collect data from different business units across multiple geographies. Is your business prepared to respond to these demands using existing, non-integrated systems? This webinar will provide a roadmap of digital maturity, and show how to take the next step in defining a unified, integrated strategy that fits your people, culture, and business. Real client case studies will be presented to show emerging best practices.

#### OUR SPEAKERS:

##### Greg Stevens and Rashmi Mantha

**GREG STEVENS.** Greg Stevens is AECOM's Digital EHS Program Lead, bringing 11 years of environmental consulting and 20 years digital EHS software implementations, professional services management, and strategic partnerships. He has led software implementations in food manufacturing, chemical manufacturing, pulp & paper, and US DOD. His expertise includes digital platform strategies, project planning and management, global EHS compliance solutions, and growing strategic partnerships in digital EHS and ESG.

**RASHMI MANTHA.** Rashmi Mantha is a Professional Geologist with over 17 years of professional experience in Compliance, Remediation, EHS and digital EHS/ESG services. Ms. Mantha has over 12 years of experience in digital EHS serving as a Project Manager and Technical Lead for the planning, design, configuration, and implementation of multiple commercial software solutions. Her expertise includes project planning, requirements gathering and gap analysis, supporting business rules development and key decisions, sharing and implementing lessons learned/best practices from previous solution implementations, application advanced configuration design and build, and custom report templates.

## Tuesday, April 4, 2023 • 1:00 p.m.\* EDT

# PFAS US Regulations – The Latest Evolution

The US Environmental Protection Agency first turned its attention on per- and polyfluoroalkyl substances (PFAS) after 2001. In 2009, USEPA released non-enforceable Health Advisories (HAs) for PFOS and PFOA in drinking water. HAs were lowered in 2016, and lowered again and expanded to include PFBS and Gen-X in 2022.

Our clients across public and private sectors—and especially water purveyors—have awaited a National Primary Drinking Water Regulation for PFAS since the USEPA set that as a goal its 2021 PFAS Strategic Roadmap.

On March 14, 2023, a draft rule setting drinking water limits was released for 6 PFAS, and it diverges from past rules by limiting 4 of the PFAS as a mixture.

We will discuss the proposed rule, explaining its basis, how it applies, and how clients may navigate implementing PFAS solutions in response.

### OUR SPEAKERS:

#### Dr. Rosa Gwinn and Kelly Vosnakis

**DR. ROSA GWINN** has worked for AECOM and legacy firms since 1991. Stemming from a 30-year career focused on solving thorny environmental issues, she currently leads AECOM's Global PFAS Technical Practice. She graduated magna cum laude from Harvard University with a bachelor's degree in Geological Sciences. She completed her master's degree and doctorate at Brown University in geochemistry.

**KELLY VOSNAKIS** is a senior human health risk assessor at AECOM with over 25 years of experience in human health risk assessment, specializing in multipathway risk assessment. Ms. Vosnakis has extensive experience conducting risk assessments for a wide range of sites, including PFAS sites and others with complex issues. She holds a Master of Science degree in Environmental Health from Tufts University and a Bachelor of Arts degree in Environmental Studies from Binghamton University.
