

Innovative Environmental Solutions in Our New World

AN AECOM ENVIRONMENTAL WEBINAR SERIES
FEBRUARY WEBINAR

Tuesday, February 28 • 4:00 p.m.* ET

Integration of Climate Change Considerations with Environmental Impact Assessment

Extreme weather events and longer-term changes in climate are damaging infrastructure and disrupting the services they provide to communities. There is increased awareness and concern among communities of the implications of climate change and the need to reduce greenhouse gas emissions. Combined, these two issues are enhancing the importance of early consideration of the implication of climate change on projects, including at the approvals stage.

REGISTER

OUR SPEAKER: Allan Klindworth

ALLAN KLINDWORTH will present on the challenges and opportunities with integrating consideration of climate change into impact assessments, from an Australian perspective. This will include both the issues of quantifying greenhouse gas emissions (i.e. a project's impact on climate change) and understanding the impacts of climate change on a project. Allan is an Associate Director in AECOM's Melbourne, Australia Sustainability and Resilience Team. He has over 20 years of experience delivering complex, thought leading climate adaptation projects. He has worked with all levels of government and private sector organisations, helping clients to understand the risks presented by the changing climate and to build their resilience through adaptation planning. Allan has assessed climate impacts and identified management responses for critical infrastructure clients in the power and transport sectors. This has included supporting impact assessments and approvals processes in Victoria, Australia and north-eastern United States.

**Our webinars are recorded, so if this time is not convenient, please register and we will be sending the recording link soon after the webinar.*

About AECOM

AECOM is the world's trusted infrastructure consulting firm, delivering professional services throughout the project lifecycle – from advisory, planning, design and engineering to program and construction management. On projects spanning transportation, buildings, water, new energy and the environment, our public- and private-sector clients trust us to solve their most complex challenges. Our teams are driven by a common purpose to deliver a better world through our unrivaled technical and digital expertise, a culture of equity, diversity and inclusion, and a commitment to environmental, social and governance priorities. AECOM is a Fortune 500 firm and its Professional Services business had revenue of \$13.1 billion in fiscal year 2022.
